## General Information

In order to estimate an applicant's future pupil population needs, all applicants wishing to participate in the State School Building Program must provide historical and current enrollment data. All enrollment is certified on the *Form SAB 411B, Enrollment Certification*, using either California Basic Education Data Systems (CBEDS) or sixth month of school year (spring) enrollment data.

All enrollment data must exclude those students enrolled in preschool, adult education and/or ROTC/ROP programs.

## Specific Information: Sections A through E

### Section A: Enrollment Data

#### *School District*

In Section A, using either CBEDS or sixth month of school year enrollment data, report the unduplicated enrollment data in all applicable grade levels for the current reporting year and the previous three reporting years.

Do *not* include Special Day Class or Continuation High School enrollment in this section.

#### *High School Districts*

Additionally, in Section A, using either CBEDS or sixth month of school year enrollment data, report the unduplicated enrollment data for grades 9 - 12 and all feeder elementary school grades for the current reporting year and the previous three reporting years.

#### *High School Attendance Area*

In Section A, using either CBEDS or sixth month of school year enrollment data, report the unduplicated enrollment data for grades 9 - 12 and all feeder elementary school grades for the current reporting year and the previous three reporting years.

A separate enrollment certification must be made for *each* high school attendance area within a school district. An additional enrollment certification must also be made identifying the district's *total* enrollment and all feeder school enrollment for all grades.

### *County Superintendent of Schools*

In Section A, using an April 1 reporting date prior to the CBEDS reporting date for regular pupils, report the unduplicated County Superintendent of Schools enrollment data for the current reporting year and the previous three reporting years. Include *only* the *total* enrollment for each reporting year. It is not necessary to identify enrollment by grade level.

In addition, please complete Section D of this form identifying enrollment for the current year by the handicapping condition identified in each pupil's Individualized Education Program (IEP).

### Section B: Feeder Schools

In Section C, for a high school district, identify all feeder elementary school districts for all grade levels.

### Section C: Special Day Class Enrollment

In Section D, report the Special Day Class (SDC) enrollment for the current school year by the handicapping condition identified in the pupil's Individualized Education Program (IEP). Grade level identification is not necessary.

Note: Report only those SDC pupils who are identified in the applicant's special education master plan.

### Section D: Resource Specialist Enrollment

In Section E, report all students enrolled in a resource specialist program.

### Section E: Continuation High School Enrollment

In Section E, report the total pupil hours and total school days for each of the three highest months in the last twelve calendar months from the date of this report. If not applicable, show as "none".

Continuation high school enrollment is reported in "pupil units". One "pupil unit" consists of six hours of attendance per day.
